

OregonDoor

we build the doors that build your reputation

| Applied Moulding

OregonDoor applied mouldings, also known as plant-on mouldings, are available as follows:

- Mouldings can be provided in most commercially available lumber species.
- Mouldings can be applied on veneer, laminate and painted doors with moulding matching or contrasting with the face of the door.
- Mouldings can be applied to fire rated doors, as long as moulding does not exceed 3/4" thickness and 2-1/2" width. Moulding arrangement may be limited by specified hardware and fire label.
- Custom layouts available.
